Key Performance Metrics and Non-GAAP Financial Measures

This release includes certain key performance metrics and financial measures not based on GAAP, including Adjusted EBITDA, Adjusted EBITDA margin, Non-GAAP gross profit, Non-GAAP gross margin, Non-GAAP operating expenses, Non-GAAP net income (loss) and Non-GAAP net income (loss) per share as well as operating metrics, including GMV, spend per buyer, active buyers and take rate. Some amounts in this release may not total due to rounding. All percentages have been calculated using unrounded amounts.

We define GMV or Gross Merchandise Value as the total value of transactions ordered through our platform, excluding value added tax, goods and services tax, service chargebacks and refunds. We define active buyers on any given date as buyers who have ordered a Gig or other services on our platform within the last 12-month period, irrespective of cancellations. Spend per buyer on any given date is calculated by dividing our GMV within the last 12-month period by the number of active buyers as of such date. Take rate is revenue for any such period divided by GMV for the same period.

Management and our board of directors use these metrics as supplemental measures of our performance that is not required by, or presented in accordance with GAAP because they assist us in comparing our operating performance on a consistent basis, as they remove the impact of items not directly resulting from our core operations. We also use these metrics for planning purposes, including the preparation of our internal annual operating budget and financial projections, to evaluate the performance and effectiveness of our strategic initiatives and to evaluate our capacity to expand our business.

Adjusted EBITDA, Adjusted EBITDA margin, Non-GAAP gross profit, Non-GAAP gross margin, Non-GAAP operating expenses, Non-GAAP net income (loss) and Non-GAAP net income (loss) per share as well as operating metrics, including GMV, spend per buyer, active buyers and take rate should not be considered in isolation, as an alternative to, or superior to net loss, revenue, cash flows or other performance measure derived in accordance with GAAP. These metrics are frequently used by analysts, investors and other interested parties to evaluate companies in our industry. Management believes that the presentation of non-GAAP metrics is an appropriate measure of operating performance because they eliminate the impact of expenses that do not relate directly to the performance of our underlying business.

These non-GAAP metrics should not be construed as an inference that our future results will be unaffected by unusual or other items. Additionally, Adjusted EBITDA and other non-GAAP metrics used herein are not intended to be a measure of free cash flow for management's discretionary use, as they do not reflect our tax payments and certain other cash costs that may recur in the future, including, among other things, cash requirements for costs to replace assets being depreciated and amortized. Management compensates for these limitations by relying on our GAAP results in addition to using Adjusted EBITDA and other non-GAAP metrics as supplemental measures of our performance. Our measure of Adjusted EBITDA and other non-GAAP metrics used herein is not necessarily comparable to similarly titled captions of other companies due to different methods of calculation.

See the tables above regarding reconciliations of these non-GAAP financial measures to the most directly comparable GAAP measures.

We are not able to provide a reconciliation of non-GAAP financial measures guidance for the fourth quarter of 2020, and the fiscal year ending December 31, 2020 to the comparable GAAP measures, because certain items that are excluded from non-GAAP financial measures cannot be reasonably predicted or are not in our control. In particular, we are unable to forecast the timing or magnitude of share based compensation, amortization of intangible assets, and income or loss on revaluation of contingent consideration, as applicable without unreasonable efforts, and these items could significantly impact, either individually or in the aggregate, GAAP measures in the future.
